

By The Numbers

More durable, clean and accurate than fabric, rubber or PVC belts, metal belts from Belt Technologies benefit a wide range of industries and work well in the most demanding production and quality control environments.

We have decades of experience producing millions of belts and drive tapes offered in thousands of uniquely engineered designs, serving customers in over 50 countries worldwide.

Our Belts Are...

STRONG

(500,000-5,000,000 cycles)

Unlike polyester, nylon or cotton belts with rubber or plastic covers, metal belts can withstand temperature extremes, vacuum conditions, and hostile, caustic environments and are not susceptible to long-term wear and tear.

PRECISE

Metal belts can accurately position your product to within 0.001" (0.025mm) and meet strict dimensional tolerances.

AND UNIQUE

Metal belts can be customized with endless combinations of alloys, sizes, perforation patterns, attachments and coatings.

WIDTH

0.040" - 35.4" (1-900mm)

THICKNESS

0.002" - 0.031" (0.05-0.8mm)

Belt Technologies has supported customers in:

PRINTING

FOOD PRODUCTION

ROBOTICS

MEDICAL

SOLAR

INDUSTRIAL

...with a countless number of unique applications that is ever-expanding.
